

DEAR SPOOKED TEAM,

I'm submitting my resume for the role of freelance composer. I am a big fan of the show and purchased a Luminary subscription solely to listen to "Spooked!". As someone who truly loves this show, it would be my honor to help create the sonically best season of "Spooked!" yet! I've had my work streamed over 14 million times on YouTube and podcasts charting in the top 100 on Apple Podcasts. My Beatstars Have over 100K listens and I'm wrapping an early 90's hip-hop sample pack w/ Aaron Redfield on Drums (Performed w/ 2pac, Prince, Elton Jon, Sia.) I love a challenge and cannot think of a more intriguing project than "Spooked!". It would be an adventure to help bring these chilling stories to life.
